

Section 5: Manage Identities
Preparation Course for Exam AZ-100
Microsoft Azure Infrastructure and Deployment

Manage Identities (15-20%)

Manage Azure Active Directory (AD)

Add custom domains; configure Azure AD Identity Protection, Azure AD Join, and Enterprise State Roaming; configure self-service password reset; implement conditional access policies; manage multiple directories; perform an access review

- [How to: Add your custom domain name using the Azure Active Directory portal](#)
- [Enabling Azure Active Directory Identity Protection](#)
- [Quickstart: Self-service password reset](#)
- [How to: Configure conditional access policies for access attempts from untrusted networks](#)
- [Manage your Azure Active Directory tenant](#)
- [Azure AD access reviews](#)

Manage Azure AD objects (users, groups, and devices)

Create users and groups; manage user and group properties; manage device settings; perform bulk user updates

- [How to: Add or delete users using Azure Active Directory](#)
- [How to: Create a basic group and add members using Azure Active Directory](#)
- [Azure AD cmdlets for working with extension attributes](#)
- [How to manage devices using the Azure portal](#)
- [Set-AzureADUser](#)

Implement and manage hybrid identities

Install and configure Azure AD Connect; configure federation and single sign-on; manage Azure AD Connect; manage password sync and writeback

- [Getting started with Azure AD Connect using express settings](#)

- [Deploying Active Directory Federation Services in Azure](#)
- [Azure Active Directory Seamless Single Sign-On](#)
- [Next steps and how to manage Azure AD Connect](#)
- [Enable password hash synchronization](#)
- [How-to: Configure password writeback](#)
